

Using the CMAS PARCC Classroom Level Workbook in Tableau

Step 1

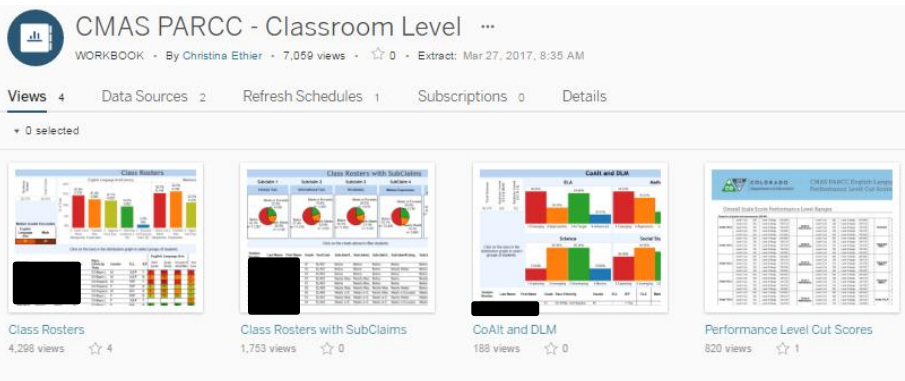

1. Log into Tableau
<https://tableau.aps.k12.co.us>
2. Enter your Network Username and Password. (**Note: This is the user name and password you use to login to the network.**)

Step 2

1. From the Home Screen select the CMAS PARCC – Classroom Level Workbook

Step 3

Once you are in the CMAS PARCC– Classroom Level Workbook, you can select one of the four dashboards:

- **Class Rosters** – provides a list of your students and their performance for both content areas. Allows filtering by scale score versus performance level, content area, test code, roster year and assessment year and demographic factors.
- **Class Rosters with SubClaims**– provides a list of your students, and details of their performance on each subclaim for selected content area. Allows filtering by content area, roster year and assessment year and demographic factors.
- **CoAlt and DLM** –provides results for students taking CoAlt and DLM. Allows filtering by roster year and assessment year and demographic factors.
- **Performance Level Cut Scores** – provides scale score cut offs for each performance level by grade and content area.

Step 4 – Using the Class Roster Dashboard

The Class Roster Dashboard provides overall performance level or scale scores for Math and English Language Arts.

You can filter this report by:

Assessment Filters

- **Content** – English Language Arts/Literacy or Math or "All"
- **testCode** – show result from a specific test
- **Assessment Year** – year test was administered

Student List Filters

- **Roster Year** – year student was on your roster
- **School Name**
- **Teacher**
- **Course**
- **Period**
- **Dropped Class**

Student Demographic Filters

- **Race/Ethnicity**-show results for only students of a specific race or ethnicity
- **Gender**-show results for a specific gender
- **ELL Status** – show results for a specific ELL status
- **IEP** – show results by whether student has an IEP

Step 5 – Using the Class Roster with Subclaims Dashboard

Make sure the "Class Roster with Subclaims" tab is selected.

View results specifically for Math or English by using Content filter.

Find specific groups of students by using the demographic filters

View number of students tested and tests for filtered group

Confidential student data

The Class Roster with Subclaims dashboard provides overall performance level as well as subclaim performance for a selected content area and group.

Assessment Filters

- **Content** – English Language Arts/Literacy or Math
- **Assessment Year** – year test was administered

Student List Filters

- **Roster Year** – year student was on your roster
- **School Name**
- **Teacher**
- **Course**
- **Period**
- **Dropped Class**

Student Demographic Filters

- **Race/Ethnicity**-show results for only students of a specific race or ethnicity
- **Gender**-show results for a specific gender
- **ELL Status** – show results for a specific ELL status
- **IEP** – show results by whether student has an IEP

Step 6 – Viewing the CoAlt and DLM Dashboard

Make sure "CoAlt and DLM" tab is selected.

View number of students tested.

Use graphs to select students with specific performance level.

Use filter to select demographic subgroups.

Confidential student data

The CoAlt and DLM Dashboard provides alternative assessment data.

Assessment Filters

- **Assessment Year** – year student was tested.

Student List Filters

- **Roster Year** – year student was on your roster
- **School Name**
- **Teacher**
- **Course**
- **Period**
- **Dropped Class**

Student Demographic Filters

- **Race/Ethnicity**-show results for only students of a specific race or ethnicity
- **Gender**-show results for a specific gender
- **ELL Status** – show results for a specific ELL status
- **IEP** – show results by whether student has an IEP
